This edited volume, Hormone Therapy and Replacement in Cancer and Aging-related Diseases, is a collection of reviewed and relevant research chapters, offering a comprehensive overview of recent developments in the field of hormone replacement therapy. The book comprises single chapters authored by various researchers and edited by experts active in the hormone replacement therapy research area. All chapters are complete in themselves but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors on hormone replacement therapy, and opens new possible research paths for further novel developments.

"The 12th edition of the manual has the following features: • The manual has been revised and updated to conform to the new syllabus for the June 2017 and subsequent exams. • The concepts of financial mathematics are explained in plain English, in a manner that appeals to your intuition and common sense. • The manual shows you tricks and shortcuts for various types of problems, warns you about common traps that students fall into, and tells you how to avoid them. • Over 1,000 problems with detailed solutions, about half of them from prior SOA/CAS exams and half that are original to the manual. • After each topic there are examples called " Stepping Stones " that are designed to tell you whether you have understood what you have just read, and to serve as a bridge to more difficult exam-level problems. • There is a summary of the key concepts and formulas after each topic. • There are 9 sets of Calculator Notes that give you detailed instructions for using the BA II Plus calculator. • Six original full-length (35 questions) practice exams, with complete solutions are included. • Over 600 pages in all."--R é sum é de l' é diteur.

With half a million copies in print, How to Read a Book is the best and most successful guide to reading comprehension for the general reader, completely rewritten and updated with new material. A CNN Book of the Week: " Explains not just why we should read books, but how we should read them. It's masterfully done. " – Farheed Zakaria Originally published in 1940, this book is a rare phenomenon, a living classic that introduces and elucidates the various levels of reading and how to achieve them—from elementary reading, through systematic skimming and inspectional reading, to speed reading. Readers will learn when and how to " judge a book by its cover.," and also how to X-ray it, read critically, and extract the author ' s message from the text. Also included is instruction in the different techniques that work best for reading particular genres, such as practical books, imaginative literature, plays, poetry, history, science and mathematics, philosophy and social science works. Finally, the authors offer a recommended reading list and supply reading tests you can use measure your own progress in reading skills, comprehension, and speed.

"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs. Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In Poor Economics, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. Poor Economics shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

This volume reviews the evidence for a causal link between sexually transmitted infection with human papillomavirus (HPV) and the occurrence of cervical cancer, from a variety of different angles. Epidemiological studies and clinical, pathological, and cytological aspects of HPV infection are reviewed. Modern methods for analyzing HPV-DNA types by molecular biological techniques are described, and the statistical problems to be overcome in epidemiological work are explained. The volume was prepared by a broad team of experts from around the world, who met in Copenhagen in March 1988 to reach a consensus on the present state of understanding and to establish directions for future work.
