Do you think that earning a living from your love for exercise is a stretch? It's not. Careers in fitness are one of the fastest-growing segments of the US job market, and leading the way are personal trainers. In fact, the ranks of personal trainers have jumped by almost 50 percent over the last ten years, and there is no sign of this job growth slowing up any time soon. Young and old, men and women, people of all income levels are signing up for fitness classes and personal training sessions at an ever-increasing rate. With obesity being blamed for many of the health problems that people face today, thousands of people throughout the nation are determined to shed their extra weight. These people are turning to personal trainers to assist them in reaching that goal. Reality television shows like *The Biggest Loser* have proven that no matter how overweight people are, they can slim down and learn how to stay fit with the aid of a knowledgeable personal trainer. Those who are already in good physical shape and want to stay that way also pay personal trainers to fine tune their exercise routines and provide expertise on the latest fitness trends. Athletes, dancers, rock singers, actors, and others whose professional careers rely on being in shape, retain personal trainers to keep them in peak form. Corporations bring in personal trainers to help top executives stay at their physical best. Today, more than ever before, the emphasis is maintaining good health by exercising and eating properly, and personal trainers can provide valuable insights in both these areas. Fitness is a service industry. Every client is different, every client needs an individualized exercise program. Being a personal trainer is not a job that can be taken over by automation or outsourced to another country. This is work that needs to be done face to face, and your clients come to rely on your services. You become an important part of their weekly routine, and you tweak their fitness programs as they go through life. Outstanding personal trainers can keep their clients for many years. When your clients look and feel good, you are rewarded. The job takes discipline and dedication. Personal trainers have to stay focused and must keep their clients motivated. You are working with people one-on-one. You are in charge of their exercise regimens, and that makes being a personal trainer a results-oriented job. Whether they love to exercise or don't, your clients want to look in the mirror and be happy with what they see. If they aren't, they may not continue working out with you. Successful personal trainers don't let their clients slack off. That means pushing clients to reach new fitness goals during every workout session, even though there are going to be days they just don't want to exercise. Each time you take on a client, you are putting your reputation on the line. With every success, the demand for your services grows, along with increased earnings. The New York Times bestseller – with a new afterword about early specialization in youth sports – from the author of *Range: Why Generalists Triumph in a Specialized World*. The debate is as old as physical competition. Are stars like Usain Bolt, Michael Phelps, and Serena Williams genetic freaks put on Earth to dominate their respective sports? Or are they simply normal people who overcame their biological limits through sheer force of will and obsessive training? In this controversial and engaging exploration of athletic success and the so-called 10,000-hour rule, David Epstein tackles the great nature vs. nurture debate and traces how far science has come in solving it. Through on-the-ground reporting from below the equator and above the Arctic Circle, revealing conversations with leading scientists and Olympic champions, and interviews with athletes who have rare genetic mutations or physical traits, Epstein forces us to rethink the very nature of athleticism.
