biology concepts through an evolutionary lens. Biology for AP<sup>®</sup> Courses was designed to meet and exceed the requirements of the College Board's AP<sup>®</sup> Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP<sup>®</sup> curriculum and includes rich features that engage students in scientific practice and AP<sup>®</sup> test preparation; it also highlights careers and research opportunities in biological sciences.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with

their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the

Broad in scope, yet precise in exposition, the Sixth Edition of this highly acclaimed ethics text has been infused with new insights and updated material. Richard Johannesen and new coauthors Kathleen Valde and Karen Whedbee provide a thorough, comprehensive overview of philosophical perspectives and communication contexts, pinpointing and explicating ethical issues unique to human communication. Chief among the authors objectives are to: provide classic and contemporary perspectives for making ethical judgments about human communication; sensitize communication participants to essential ethical issues in the human communication process; illuminate complexities and challenges involved in making evaluations of communication ethics; and offer ideas for becoming more discerning evaluators of others communication. Provocative questions and illustrative case studies stimulate reflexive
