It's safe to say that few people have lived lives as thoroughly devoted to plants as Peter H. Raven has. The longtime director--now president emeritus--of the Missouri Botanical Garden, author of numerous leading textbooks and several hundred scholarly articles, Raven has been a tireless champion of sustainability and biodiversity, earning him the plaudit of "Hero for the Planet" from Time. Driven by Nature is the first chronicle of this prominent scientist and conservationist's life. Moving from his idyllic childhood in the San Francisco of the 1940s to his four decades leading the Missouri Botanical Garden, Raven's autobiography take readers across multiple continents and decades. Driven by Nature follows the globetrotting botanist from China to the American Midwest as he works to foster concern for a changing planet, further the cause of biological education, and build the Missouri Botanical Garden into the world-renowned haven for plant life it is today. Raven brings his story into the twenty-first century with a timely epilogue that reinforces the crucial importance of scientific learning, active conservation, and committed activism in the face of a rapidly changing natural world. Featuring an introduction by the Pulitzer Prize-winning naturalist E. O. Wilson, this beautifully illustrated book should thrill nature lovers, plant enthusiasts, and environmentally-conscious readers looking to take action to preserve our planet's biodiversity.

Esperanza Rising joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content! Esperanza thought she'd always live a privileged life on her family's ranch in Mexico. She'd always have fancy dresses, a beautiful home filled with servants, and Mama, Papa, and Abuelita to care for her. But a sudden tragedy forces Esperanza and Mama to flee to California and settle in a Mexican farm labor camp. Esperanza isn't ready for the hard work, financial struggles brought on by the Great Depression, or lack of acceptance she now faces. When Mama gets sick and a strike for better working conditions threatens to uproot their new life, Esperanza must find a way to rise above her difficult circumstances--because Mama's life, and her own, depend on it.

The blockbuster phenomenon that charts an amazing journey of the mind while revolutionizing our concept of memory An instant bestseller that is poised to become a classic, Moonwalking with Einstein recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top "mental athletes." He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

This research book provides a strategic approach to understanding the nature of tourism crises and disasters highlighting the need for integrated crisis and disaster planning, response and long term recovery strategies. It will be essential reading for tourism academics and students as well as tourism managers and government officials involved in tourism management and marketing.

The introduction to the Lushootseed-English section catalogs Lushootseed word-building structures, and entries exemplify each prefix, suffix, and root. The English-Lushootseed section features encyclopedic entries on many culturally significant topics such as Native canoe classifications and animal names. Scientific classifications are included for botanical terms, and cultural information makes the volume interesting for the nonlinguist. An extensive introduction explains the structure of entries and provides clear definitions of grammatical terms. A detailed description of the sounds of Lushootseed will be invaluable for learners of the language. The traditional dictionary format is readable and economical, resulting in a volume of manageable size.

This self-contained text describes breakthroughs in our understanding of the structure and interactions of elementary particles. It provides students of theoretical or experimental physics with the background material to grasp the significance of these developments.

Modern humanity with some 5,000 years of recorded history has been experiencing growing pains, with no end in sight. It is high time for humanity to grow up and to transcend itself by embracing transhumanism. Transhumanism offers the most inclusive ideology for all ethnicities and races, the religious and the atheists, conservatives and liberals, the young and the old regardless of socioeconomic status, gender identity, or any other individual qualities. This book expounds on contemporary views and practical advice from more than 70 transhumanists. Astronaut Neil Armstrong said on the Apollo 11 moon landing in 1969, “ One small step for a man, one giant leap for mankind. ” Transhumanism is the next logical step in the evolution of humankind, and it is the existential solution to the long-term survival of the human race.
