Peterson's Graduate Programs in Biomedical Engineering & Biotechnology, Chemical Engineering, and Civil & Environmental Engineering contains a wealth of information on colleges and universities that offer graduate degrees in these cutting-edge fields. The institutions listed include those in the United States, Canada, and abroad that are accredited by U.S. accrediting bodies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on

Access Free Chemical Engineering Internships Houston Tx

financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

This book conveys the scope of chemical and biomolecular engineering practice, with a goal of helping students interested in studying chemical engineering and biomolecular engineering to understand the many potential career pathways that are available for graduates in these dynamic fields. Written so that it can be read by high school students and the general public, this book can serve as a supplement to both introductory courses on chemical engineering theory and calculations, and other "introduction to engineering" college courses that are aimed at helping students decide which branch of engineering (and thus course of study) might be most interesting to them.

Peterson's Graduate Programs in Engineering & Applied Sciences 2012 contains a wealth of information on accredited institutions offering graduate degree programs in these fields. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Lists internship opportunities in a variety of fields, giving information about selectivity, compensation, deadlines, and duration.
