Despite the tendency of scholarship to rely on accounts of religious women written by men, members of female religious houses or orders were active participants in the religious dialogues of the late Middle Ages and wrote extensively about themselves. This study draws on literary material on church reform produced by German-speaking communities of Italy, Switzerland, Germany and the Low Countries, from a female perspective. In particular, Anne Winston-Allen focuses on the Observant movement which originated in Italy in the 14th century and sought to 'revive piety and reform religious orders'. Through exploring what it was that women wrote about themselves, religious reform, piety and spirituality, she gains a better understanding of the reasons why women supported or opposed the reform and how they portrayed themselves in this process.

#1 New York Times bestselling author Frederick Forsyth delivers an international thriller that takes readers into the darkest hearts of men and nations... In a remote corner of the impoverished African republic of Zangaro lies Crystal Mountain. At certain times of the day, the mountain itself seems to glow with a strange light. Only the ruthless and untouchable tycoon Sir James Manson knows why: the mountain contains billions of dollars worth of the world's most valuable mineral-platinum. And he wants it all. To do so, he must first remove the unfriendly government currently in power and replace it with a puppet regime. Towards this end, Manson hires the deadly Cat Shannon and his team of mercenaries to do the dirty work. But he didn't realize how bloody things were going to get. And when he betrays the mercenaries to a brutal fate, he doesn't realize how far Shannon is willing to go for revenge...

How did neighborhood groceries, parish halls, factories, and even saloons contribute more to urban vitality than did the fiscal might of postwar urban renewal? With a novelist's eye for telling detail, Douglas Rae depicts the features that contributed most to city life in the early "urbanist" decades of the twentieth century. Rae's subject is New Haven, Connecticut, but the lessons he draws apply to many American cities. *City: Urbanism and Its End* begins with a richly textured portrait of New Haven in the early twentieth century, a period of centralized manufacturing, civic vitality, and mixed-use neighborhoods. As social and economic conditions changed, the city confronted its end of urbanism first during the Depression, and then very aggressively during the mayoral reign of Richard C. Lee (1954-70), when New Haven led the nation in urban renewal spending. But government spending has repeatedly failed to restore urban vitality. Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed-use city life so appealing and so civilized. Cities need not reach their old peaks of population, or look like thriving suburbs, to be once again splendid places for

human beings to live and work.

Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.

The LT1, along with its more powerful stablemate, the LT4, raised the bar for performance-oriented small-blocks until the introduction of the LS1 in 1997. The LT1/LT4 engines are powerful, relatively lightweight, and affordable. They powered Chevrolet's legendary Impala SS (and thousands of similar police cars), Corvettes, and Camaros and remain viable choices for enthusiasts today. This book investigates every component of these engines, discussing their strong and weak points and identifying characteristics. Upgrades and modifications for both improved power production and enhanced durability are described and explained in full.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
