Fujitsu Air Conditioning AC Error Codes And Troubleshooting

A fault condition is signified by flashing red LEDs on the the outdoor PCB if it is equipped with one.

Except for multi splits and 2 LED models, the diagnostics are shown in the table on the right. For 2 LED models flashing signifies sensor failure and constantly lit indicates high discharge temperature.

Fujitsu Air Conditioner Troubleshooting
In the event of a malfunction (burning
smell, etc.), immediately stop operation,
disconnect the Power Supply Plug, and
consult authorized service personnel.
Merely turning off the unit's power switch
will not completely disconnect the unit
from the power source.

FUJITSU GENERAL AIR CONDITIONING UK AND AUK DISTRIBUTION FORM NEW PARTNERSHIP

FUJITSU GENERAL United Kingdom
All Fujitsu air conditioner models feature heat pump inverter technology which are highly efficient in operation and conserve electricity usage. The Fujitsu air conditioning ASYG-KMTA has a attractive new flat front panel design on the indoor units which provides easier cleaning as the air return remains hidden at the top and the front fascia has no air inlet.
