Most heat transfer is by convection. $Q = \dot{m} c_p (T_a - T_s)$ From Table 1J $h = 4-5 \text{ m}^2 \cdot \text{s}^{-1} \cdot \text{C}^{-1}$ (conv = f; $h = 10 \text{ W/m}^2 \cdot \text{C}$ (2 sides) $q_{\text{rad}} = \epsilon \sigma (T_a^4 - T_s^4)$ (2 sides) $= 28.7 \text{ W/m}^2$ $q_{\text{total}} = 24.3 \text{ W/m}^2 + 28.7 \text{ W/m}^2 = 53 \text{ W/m}^2$ Convection and radiation are about the same magnitude. $q_{\text{total}} = q_{\text{conv}} + q_{\text{rad}} = 0$ (insulated) $q_{\text{conv}} = hA(T^* - T)$

In Alison Kent's brand-new novel set in Miami's sultry South Beach, Finn finds a woman who can melt his ice-cool exterior with one look, and a case that could land them both in hot water. . . Finn McLain is no stranger to unusual assignments. But the gorgeous stranger who just asked him to photograph her for an erotic art exhibit--that's definitely a first. Finn came to Miami to dig into the personal life of boutique manager Roland Green for a lovesick gallery owner, and hadn't planned on sticking around. But the boutique's owner, Olivia Hammond, has just made him a proposal that's as hard to ignore as Olivia herself. She's got caramel-kissed skin, a body that makes grown men tremble, and a wild sideline as an exhibitionist. Ooookay. Yet despite her willingness to "let people look," Finn's convinced there's a hell of a lot Olivia's not revealing. And that's the most intriguing prospect of all. . . Olivia has never been shy about using her sexuality to get what she wants. But then, she's never wanted a man quite the way she wants Finn. What he thinks about her shouldn't matter, yet it does. Through every candid photograph and every heated encounter, Finn is getting closer, intent on getting beneath her shell--and for once, Olivia is tempted to let him. But first they have to contend with the fact that Finn's simple investigation into Roland Green is getting dangerously complicated. . .and Olivia isn't the only person in town who's not what she claims to be. In a city throbbing with sex appeal, two wary lovers are about to play the ultimate game of show and tell, where temptation is raw, wild, and hot enough to make you sizzle. . . ". . .sizzles and thrills, with characters so sexy they scorch the pages!" --Tess Gerritsen

Progress of thermodynamics has been stimulated by the findings of a variety of fields of science and technology. The principles of thermodynamics are so general that the application is widespread to such fields as solid state physics, chemistry, biology, astronomical science, materials science, and chemical engineering. The contents of this book should be of help to many scientists and engineers.

CD-ROM contains: the limited academic version of Engineering equation solver(EES) with homework problems.

Throughout the world, there is a need to manage pests in both semi-natural and plantation forests. The sustainable management and control of forest pests depends on the development of Integrated Pest Management (IPM) programmes. A central theme of this book is an examination of the ecological context of the major components of IPM and how and when to apply them in the management of forest pests. The book focuses predominantly on insect pests, but many examples relate to fungal pathogens, some of which are vectored by forest insects. While most examples are from temperate regions, the critical analysis of IPM is relevant to forests world-wide. The book is aimed at undergraduate and postgraduate students of applied entomology and ecology, forestry, agro-forestry, conservation biology and environmental sciences. It will also be of value to managers of IPM programmes in agriculture as well as forestry.

The Holman Bible Atlas offers a visual feast through which the reader can explore the world of the Bible. Utilizing 140 full color maps key to biblical events and 140 full color photographs illustrating the land, sites, and archaeology of the biblical world, the Atlas draws the reader into the biblical story. The Holman Bible Atlas begins with an introduction to the geography of the biblical world emphasizing the major physical features of the Ancient Near East with special attention given to the geographical regions of Palestine. Information about daily life and the role of archaeology in recovering ancient cultures are discussed.
