As we spoke with HDT Truck Fleet Innovators for our June cover story on ways to save fuel, it became evident that auxiliary power units are a perfect example of how fuel-saving specs are not one ...

Corporate saving is one of the most significant source of funds for financing corporate growth. It has both micro as well as macro significance. In spite of such dual importance of this decision problem, the theoretical determinants of corporate savings are less well established and this is an area in which very little research has been done so far. The present work is an effort in this direction. The main highlights of the present work in context to General Engineering Industry are : \bullet In general engineering industry, saving decision is considered as a primary decision variable in the firm's policy framework. \bullet Saving decision of firms is primarily governed by \bullet profit after tax , a measure of firm's capacity to save. \bullet Previous year's dividend is very often taken into account by firms as an important determinant while framing their saving policy. \bullet Investment demand has a significant influence on the saving decision of firms. \bullet External finance is negatively related to the saving decision of firms. \bullet Increase in interest payment would induce firms to rely more on corporate saving.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
