Group HES

A division of the leading hydraulic and fluid power company, Group HES, Branch Hydraulic Systems (Branch) are responsible for the design, manufacture, installation, repair and service of hydraulic power units and systems. With an in-house design and engineering team, headed up by technical director, Alex Tatlow, the division was able to offer Winkworth a bespoke hydraulic power solution.

Winkworth Hydraulic Power Units Group HES

Through working extensively within the aerospace industry, Branch Hydraulic Systems are experts in working with industry specific fluids such as Skydrol (500B4, LD4) and Hyjet IV as well as high viscosity lubrication fluids, biodegradable oils, water glycol (HFC) and oil in water emulsions (HFA) as required for offshore installations. For more information and to start your hydraulic power unit project, contact the team today on 01452 730 562 or enquiries@grouphes.com.

Manufacturing Hydraulic Power Units - Group HES

The Skydrol hydraulic power unit was designed to provide variable flows from an inverter driven pump. The unit supplies several different aerospace test rigs with pressures of up to 414 bar. If you require a Skydrol power unit or other hydraulic power unit, please do not hesitate to contact us on 01452 730562 or email enquiries@grouphes.com or visit the Branch Hydraulic Systems ' page.

Hydraulic Power Units Group Hes - wiki.ctsnet.org

Hydraulic power units, often referred to as power packs, are machines which use liquid fluid power to perform work. They are a free-standing system that invariably includes a mechanical actuator or motor, a fluid receptacle or reservoir, and a pump to convert mechanical power into hydraulic energy.
