Life in America often rushes past us at a blazing speed. In this provocative and witty book, Steven Michael Hubele chronicles some of the events in his life spent with his fifty-year relationship with his father and twenty-five years of experience as a father to his two daughters. His story is full of all the minor disasters and wonderful coincidences that characterize life in the Midwest. Before his life as a published author, Steve took notes and kept track of interesting and sometimes tragic events, but always tried to keep a sense of humor. Brought to life are stories about work, playing golf, and learning how to act from his father in life and in sickness. In his trademark celebratory comment, each story ends with the words, The memories remain. The hope for reading this book is that it brings some peace as a source of merriment. Yesterdays failures and triumphs earn tomorrows joys. Steven Michael Hubele is the author of Almost Full Circle. He lives in Affton, a modest community in St. Louis County, Missouri. He continues to tell more stories and make more memories for his two daughters, just as his father did for him. Author photograph: by Allison Hubele

Praise for How I Became a Quant "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, How I Became a Quant details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional

investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

The recent re-emergence of serious games as a branch of video games and as a promising frontier of education has introduced the concept of games designed for a serious purpose other than pure entertainment. To date the major applications of serious games include education and training, engineering, medicine and healthcare, military applications, city planning, production, crisis response, to name just a few. If utilised alongside, or combined with conventional training and educational approaches, serious games could provide a more powerful means of knowledge transfer in almost every application domain. Serious Games and Edutainment Applications offers an insightful introduction to the development and applications of games technologies in educational settings. It includes cutting-edge academic research and industry updates that will inform readers of current and future advances in the area. The book is suitable for both researchers and educators who are interested in using games for educational purposes, as well as game professionals requiring a thorough understanding of issues involved in the application of video games technology into educational settings. It is also applicable to programmers, game artists, and management contemplating or involved in the development of serious games for educational or training purposes.

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

This collection of new essays by eleven distinguished environmental philosophers addresses two main questions: first, whether environmental philosophy and ethics should be seen as a form of applied philosophy or as something else, perhaps best called practical philosophy; and second, how environmental philosophy is practiced in human life, especially in the lives of academics.

A collection of traditional Nova Scotian folktales, superstitions and home remedies compiled by

the Canadian folklorist and author of *Bluenose Ghosts*. Beginning in 1928, Dr. Helen Creighton traveled across her native Nova Scotia seeking out and recording its rich heritage in the form of ghost stories, folktales, and folksongs. She first shared her findings in 1957 with the collection *Bluenose Ghosts*, and followed its success eleven years later with *Bluenose Magic*, both of which are considered classics of Maritime literature. This fascinating volume welcomes readers into a supernatural world of witchcraft, enchantment, and buried treasure. It shares stories of the region's indigenous Mi'kmaq people as well as variations of tales brought over from Europe. Here too are folk remedies, dream interpretation, divination, superstitions, and more that has been passed on from generation to generation of Nova Scotia's families

This book is designed for parents who want to help their children and for teachers who wish to prepare their class for the NAPLAN Tests. NAPLAN Tests are sat by Year 5 students Australia-wide. These tests are held in May every year. The tests are in Literacy and Numeracy.
