Gather information about the property. Finding land surveys may require fairly specific information about the property, such as the street address, a boundary description, or a plat number. The more information you have, the more likely you'll find the survey you need. Get information about the township, county, and land range.

There are a few ways you can ask about gender—depending on what you want to do with this information later and how many people you are looking to survey. The simplest way to do this is just to ask, “Gender?”, and allow people to self-describe. With bigger sample sizes, present people with a drop-down answer selection.

~~5 Demographic Survey Questions You Need + Examples & Tips ...~~

When you run a survey on your website, the questions you ask are important, but so is the place where you ask them. For example: a landing page is a great place for a survey asking people how they found your site, but not the best one if you're looking for feedback on the website experience as a whole.

Fundamentally, a survey is a method of gathering information from a sample of people, traditionally with the intention of generalizing the results to a larger population. Surveys provide a critical source of data and insights for nearly everyone engaged in the information economy, from businesses and the media to government and academics.
