Book 2 of 'The Stewards of Light' series, and sequel to 'My Science Teacher is a Wizard.' Blake Drywater and his fellow unfortunate students at Millard Fillmore Middle School once more find themselves facing an unexpected creature in one of their classes. Because of a sudden 'neck disorder' suffered by their math teacher, Blake and his classmates receive a chilling substitute. His name is Mr. Coagulate, who has a strange fascination with blood and dreams. Meanwhile Blake's former science teacher, Mr. Marlin, uses his wizard skills to annoyingly turn himself into objects in Blake's

Mr. Marlin warns Blake that his substitute math teacher is actually a vampire, determined to enslave Blake and use him as an unwilling warrior in the battlefield of vampire nightmares. And in spite of Blake's best efforts to stay out of such a horrible place, he unwillingly finds himself in the midst of the vampire battle one night, where he learns that nothing ever works out the way it should.

Moscow has a rich tradition of successful math circles, to the extent that many other circles are modeled on them. This book presents materials used during the course of one year in a math circle organized by mathematics faculty at Moscow State University, and also used at the mathematics magnet school known as Moscow School Number 57. Each problem set has a similar structure: it combines review material with a new topic, offering problems in a range of difficulty levels. This time-tested

Theorem proved its effectiveness in engaging all students and helping them master new material while building on earlier knowledge. The introduction describes in detail how the math circles at Moscow State University are run. Dorichenko describes how the early sessions differ from later sessions, how to choose problems, and what sorts of difficulties may arise when running a circle. The book also includes a selection of problems used in the competition known as the Mathematical Maze, a mathematical story based on actual lessons with students, and an addendum on the San Jose Mathematical Circle, which is run in the Russian style. Theorem, probability theory, knot theory, cryptography, fractals, and number theory. Each chapter in the first part of this book consists of two parts. It starts with generously illustrated sets of problems and hands-on activities. This part is addressed to young readers who can try to solve problems on their own or to discuss them with adults. The second part of each chapter is addressed to teachers and parents. It includes comments on the topics of the lesson, relates those topics to discussions in other chapters, and describes the actual reaction of math circle participants to the proposed activities. The supplementary problems that were discussed at workshops of Math Circle at
