When sixteen-year-old Jenny James goes missing, and the local police are unable to find her, the girl's frantic mother hires private investigators Jake and Annie Lincoln to search for her daughter. When the body of Jenny's boyfriend is discovered, the mystery of her disappearance deepens. Shaken out of their comfort zone of Internet searches and poring over public records, the couple soon find themselves facing the frightening possibility they are looking for the latest victim of a serial killer. As more bodies pile up, the town is gripped with fear. It seems no one is safe, and the Lincolns race to solve an impossible puzzle before they become the killer's next victims. + + + Category Keywords: free, freebies, female protagonist, serial killer, vigilante justice, women sleuths, Crime Fiction, police procedurals, Murder, Kidnapping, private detective, Mystery, mystry, suspense, Suspense, mysteries, thrillers, Canada, Canadian, Mystery & Detective, Private Investigators Series, International, Cozy, ebook, criminal fiction, thriller novels, free books, Serial Killers, ebooks, Police

It is the Dark Ages and something evil is stirring. A ship sailing from Noviomagus across the channel to Gaul is caught in a ferocious storm and dashed against the rocks. There are only two survivors of the wreck, both children, and they are tossed up on the shore with a mysterious trunk. An old man rescues them from the beach. He seemed to know they would be coming, and he also appears very interested in the trunk. They cannot escape what lies inside, it is both good and evil, but binds itself to their destiny and sets them on a path which they are forced to follow, and face what lies at the end.

Using Shakespeare's work to expand our understanding of what it is to be human, this book of applied psychoanalysis furthers the study of Shakespeare, literary theory, dramatic arts, and psychoanalytic theory. It is also accessible to readers, theatre-goers and those who have an interest in the human condition. With intellectual rigour, and close textual analysis, it values the insights of many creative writers such as T. S. Eliot, James Joyce, W. H. Auden, Samuel Taylor Coleridge, as well as Sigmund Freud, Heinz Kohut and D.W. Winnicott. For the clinician, this book introduces new theories in psychoanalysis based upon the text and clinical experience. Psychoanalysts looking at literature are at a disadvantage, as the value system belongs solely to the realm of literary theory proper. Literary theory, in turn, often finds what the scholar seeks. It is not surprising that this potentially enriching combination of literary theory and psychoanalysis has had difficulty sustaining its relevance and tends towards reductionism.

He's come to do a job. A job that involves a body. A body wrapped in duct tape found hanging from the goal posts at the end of the football field. You Killed Wesley Payne is a truly original and darkly hilarious update of classic pulp-noir, in which hard-boiled seventeen year-old Dalton Rev transfers to the mean hallways of Salt River High to take on the toughest case of his life. The question isn't whether Dalton's going to get paid. He always gets paid. Or whether he's gonna get the girl. He always (sometimes) gets the girl. The real question is whether Dalton Rev can outwit crooked cops and killer cliques in time to solve the mystery of "The Body" before it solves him. Sean Beaudoin (Going Nowhere Faster, Fade to Blue) evokes the distinctive voices of legendary crime/noir authors Dashiell Hammett and Jim Thompson with a little bit of Mean Girls and Heathers thrown in for good measure. It'll tease you, please you, and never ever leave you. Actually, that's not true. It's only a book. One that's going to suck you in, spit you out, and make you shake hands with the devil. Probably.

This book covers ASP and is focussed on beginner to intermediate skilled programmers. It is especially designed for those who want to pick up the basics of ASP and build interactive Web sites fairly quickly. It has a series of ASP projects at the end of the book, which will help consolidate the ASP concepts in the book and firm up your skills. If this book is coupled with the book entitled 'Web Enabled Commercial Application Development using HTML, DHTML, JavaScript, PERL CGI, an excellent set of reference material on Web based technology will be available to the reader. We hope that you have as much fun reading and understanding ASP as the author had when he wrote this book.

Over 100 storyboards with simple descriptions.

"July 2002 - nine men are trapped in a collapsed mine with no food or drinking water. In their underground grave the waters are rising and the oxygen vanishing. They face imminent death from suffocation or drowning. Miraculously all nine of the miners survived. It took 77 hours to rescue them from a tiny, pitch-black chamber of rock, only 3 feet high. This is their terrifying and moving story. The only official story, told in the miners' own voices, with chapters from their wives, girlfriends and mothers who waited up above with increasing desperation. This is a rare, and raw, book. How did these nine men prepare for death? What did they think about as the waters rose, as breathing became harder and harder-? A nail biting and life-changing account of a nearly tragic disaster."

Their buzzes, beeps, bells, and tunes have disrupted countless classes, movies, and meals; public auditoriums now have signs posted prominently asking people to turn their cell phones off; cities such as Santa Fe have banned their use in automobiles. But these little connection gadgets have become ubiquitous because they are so useful-many would blanch at the thought of losing their cell phone. Cell phones are useful because of the science, technology, and design that are blended to make them function. In this work, authors Michele Sequeira and Michael Westphal help young people explore this now-commonplace, socially important gadget that connects today's youth with their friends. The underlying science and technologies, and some of the history that has influenced the development of cell phones, are discussed. Emphasis is given to building science and technology concepts through simple analogies with commonplace items and ideas.
