In this fully updated and revised new edition of his landmark study of violence in and around contemporary sport, Kevin Young offers a comprehensive sociological analysis of an issue of central importance within sport studies. The book explores organised and spontaneous violence, both on the field and off, and calls for a much broader definition of 'sports-related violence', to include issues as diverse as criminal behaviour by players, abuse within sport and exploitative labour practices. Offering a sophisticated theoretical framework for understanding violence in a sporting context and including new case studies and updated empirical data - from professional soccer in Europe to ice hockey in North America - the book establishes a benchmark for the study of violence within sport and wider society. Through close examination of often contradictory trends, from anti-violence initiatives in professional sports leagues to the role of the media in encouraging hyper-aggression, the book throws new light on our understanding of the socially-embedded character of sport and its fundamental ties to history, culture, politics, social class, gender and the law. This new edition also recognises burgeoning new literatures, such as research examining concussion and the link between sport and mental illness and includes student-friendly pedagogical aids, such as critical thinking questions at the end of each chapter. Sport, Violence and Society is a vital read for anyone studying or working in the areas of the Sociology of Sport, Sport Psychology, Ethics and Philosophy of Sport, Sport and Politics, Sports History, and Sport and the Media.

Harness the 'power of two': Differentiated instruction plus technology equals a better learning environment for diverse students. Differentiating Instruction with Technology in K-5 Classrooms helps today's educators understand how to immediately use technology as a tool to differentiate instruction. The authors provide a variety of practical instructional strategies to accommodate a broad range of learning styles, abilities, and curriculum content. Creative, ready-to-use lessons mapped to curriculum content standards, activities, and templates allow teachers to kick-start their use of technology in differentiating instruction. Learn how to use technology to differentiate by student interest, readiness, ability, learning profile, content, process, and product. A chapter dedicated to applying technology to specific subjects--art, music, physical education, and foreign language--rounds out the instruction-specific content. The final two chapters focus on using technology to assess student learning and manage the differentiated classroom. Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days-or weeks-have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters-people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider-much less one who bears the telltale scars of a Beater attack-but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and
