WINNER OF THE BRITISH BOOK DISCOVER AWARD 2022 Where were you when Keisha the Sket first broke the internet? Keisha is a girl from the ends, sharp, feisty and ambitious; she's been labelled 'top sket' but she's making it work. When childhood crush and long-time admirer, Ricardo, finally wins her over, Keisha has it all: power, a love life and the chance for stability. But trauma comes knocking and with it a whirlwind of choices that will define what kind of a woman she truly wants to be. Told with the heart and soul of the inner city, with an unforgettable heroine, Keisha the Sket is a revelation of the true, raw, arousing and tender core of British youth culture. Complete with essays from esteemed contemporary writers Candice Carty-Williams, Caleb Femi and Aniefiok Ekpoudom.

Alfred D. Chandler, Jr. was, by general consensus, the pre-eminent business historian of the twentieth century. Through a prodigious body of work, Chandler made the study of the evolution of business enterprise integral to the study of the evolution of economy and society. His work combined detailed historical investigations with grand sociological syntheses. As a result, Chandler's study of the modern business enterprise invited social scientists and business academics as well as historians to contribute to our understanding of a central institution of our time. Chandler revealed how managerial activity was central to the functioning of successful industrial corporations, and hence to the performance of the economy as a whole. This book gathers together contributions from management scholars fundamentally influenced by the work of Chandler to discuss management innovation, the ways in which people who exercise strategic control over the allocation of resources put in place organizational structures that can enable an enterprise to prosper and grow. The volume offers a range of perspectives to examine the challenges that corporate management encounters.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon

became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"
