First published in 1976, Paul Johnson's exceptional study of Christianity has been loved and widely hailed for its intensive research, writing, and magnitude—"a tour de force, one of the most ambitious surveys of the history of Christianity ever attempted and perhaps the most radical" (New York Review of Books). In a highly readable companion to books on faith and history, the scholar and author Johnson has illuminated the Christian world and its fascinating history in a way that no other has. Johnson takes off in the year AD 49 with his namesake the apostle Paul. Thus beginning an ambitious quest to paint the centuries since the founding of a little-known 'Jesus Sect', A History of Christianity explores to a great degree the evolution of the Western world. With an unbiased and overall optimistic tone, Johnson traces the fantastic scope of the consequent sects of Christianity and the people who followed them. Information drawn from extensive and varied sources from around the world makes this history as credible as it is reliable. Invaluable understanding of the framework of modern Christianity—and its trials and tribulations throughout history—has never before been contained in such a captivating work.

The New York Times bestseller and definitive history of Christianity for our time—from the award-winning author of The Reformation and Silence A product of electrifying scholarship conveyed with commanding skill, Diarmaid MacCulloch's Christianity goes back to the origins of the Hebrew Bible and encompasses the globe. It captures the major turning points in Catholic, Protestant, and Orthodox history and fills in often neglected accounts of conversion and confrontation in Africa, Latin America, and Asia. MacCulloch introduces us to monks and crusaders, heretics and reformers, popes and abolitionists, and discover Christianity's essential role in shaping human history and the intimate lives of men and women. And he uncovers the roots of the faith that galvanized America, charting the surprising beliefs of the founding fathers, the rise of the Evangelical movement and of Pentecostalism, and the recent crises within the Catholic Church. Bursting with original insights and a great pleasure to read, this monumental religious history will not soon be surpassed.

Subtitled “The Thousand-Year Golden Age of the Church in the Middle East, Africa, and Asia—and How It Died,” it explores the extinction of the earliest, most influential Christian churches of China, India, and the Middle East, which held the closest historical links to Jesus and were the dominant expression of Christianity throughout its first millennium. The remarkable true story of the demise of the institution that shaped both Asia and Christianity as we know them today, The Lost History of Christianity is a controversial and important work of religious scholarship that sounds a warning that must be heeded.

been collected in this one volume. A must for New Testament scholars, and students of early Judaism, it will also be welcomed by the many lay persons for whom Professor Flusser has provided illumination on the origins of Christian faith.

When it comes to the history of the universe, many believe that science and faith are mutually exclusive. But in this revised version of *Origins*, physics professors Loren and Deborah Haarsma explore what God's Word and God's world teach us about creation, evolution, and intelligent design. Clearly explaining the science, the authors focus on areas where Christians agree. They also present the strengths and weaknesses of areas where Christians differ. *Origins* helps you develop a deeper understanding of the origins of the universe and sort out your own views on faith and science. Small group discussion questions follow each chapter. A companion website provides resources for further study.
