Can China's Belt and Road Initiative (BRI) promote sustainable development, alongside its primary aims of increasing commercial connectivity with China's partners? In discussions of the BRI the focus has tended to be on the implications for infrastructure construction,

The initiative has not only set principles to prevent climate change and promote sustainable development, but also pledged to align with the UN's environmental objectives. The situation of state-owned enterprises (SOEs) in Latin America and the Caribbean continues to be dire. This book

uses an original database of SOE performance that shows that every year about one-third of such enterprises in the region report losses (up to 70 percent in some countries) and that they require between 0.3 and one percentage point of GDP in fiscal transfers to cover such losses. Countries in the region have

Acces PDF Thomson One 5 Eikon

adopted centralized agency monitoring of their SOEs, managed to reduce the fiscal burden of SOEs, shown better financial returns, and accumulated less liabilities to GDP, thus generating less fiscal risk for the government overall. Each of the chapters provides a practical way to solve either asymmetry of information problems

in the monitoring of SOEs or solutions to reduce the discretionary nature of the fiscal governance of SOEs. Chapter 2 details the kinds of fiscal risks and contingent liabilities that SOEs create for governments and provides a set of controls to limit those risks. Chapter 3 shows that allowing SOEs to issue bonds has been an

Acces PDF Thomson One 5 Eikon

ineffective way of hardening their budget constraint, given that investors price those bonds at a discount. Chapter 4 presents a state-contingent financial instrument that allows investors to value an SOE. Chapter 5 provides empirical evidence on the advantages of SOE centralized monitoring agencies in Latin America and the

Acces PDF Thomson One 5 Eikon

Caribbean, highlighting Chile, Peru, and Paraguay. Chapter 6 examines the experience of East Asian countries with holding companies and discusses when holding companies are a better vehicle to control SOEs. Chapter 7 suggests ways to align the incentives of politicians and SOE managers to provide better goods and

services. Finally, Chapter 8 provides a practical guide to improve the monitoring of SOEs and to design a centralized monitoring agency.
