Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. GENRE IN A CHANGING WORLD provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

This book is about managing dealers, distributors and agents in international markets - an essential guide to anyone doing business globally. If you want or need to expand business through an international network of resellers, then this book is well worth an hour or two of your time. International Sales and the Middleman provides a down-to-earth, practical, and insightful guide that will enable export sales managers to build - or rebuild - a distribution network from scratch. It provides detailed advice on selection, negotiation, initiation, training (where appropriate), motivating, development, and managing overseas agents to ensure the maximum sales result. It also includes advice on local customs. It is well known that almost all international sales have to pass through middlemen at some stage or other. But how do you go about finding the right agents, what sort of arrangements should you negotiate, and on what terms - and most important of all, how do you manage and motivate the agents once you have them...? Whether you are a new manager or one who already has the right team in place, this book will show you how to improve performance and motivate both agents and customers worldwide - with spectacular results.

Plato provided 53 physical clues in his famous dialogue Critias -- the original account of the story of Atlantis that is the sole basis of all Atlantis research. The book proves that the island of Cyprus and the underwater landscape just south of Cyprus is a perfect match with 51 of these clues. Exclusive 3D bathymetric maps based on new scientific data show for the first time a stretch of sunken land off of Cyprus. The general layout of the landscape of Atlantis as described by Plato is easily discernible on this underwater land mass, as well as the precise location of its capital-Atlantis City. This robust empirical data is joined with other original findings based on mythological analysis and historical research, making the case for Cyprus increasingly obvious. With this compelling new interpretation of Plato, author Robert Sarmast brings the legendary island of Atlantis alive for the first time. With the location so clearly mapped in this book, the next step in this exciting research is an expedition to the region. Humankind may soon witness the filming of the colossal ruins of this once-mighty empire and proceed to resurrect Atlantis from its watery tomb!
